GIUSEPPE BAVUSO

# Giuseppe Bavuso

*Biography*

Architect and designer, he lives and works in Seregno, Italy.

His projects are characterized by the combination between a strong rigor, almost minimalistic, and great technical competences, merged with the smart use of innovative and technological materials.

At the beginning of his career, he was involved in many important projects in a variety of sectors, ranging from architecture, to design, to the furnishing of large collective environments, as well as the interior planning and realization of trains and sleeping cars.

In 1986, he opens his own design

office and starts multiple collaborations with companies in the biomedical and furnishing field.

From the beginning meeting Bruno Munari, has been instrumental in his work. This attendance was illuminating and fundamental, profoundly marking his way of interpreting the profession and the approach to Design.

Architect, designer and art director, he takes care of the product from the conceptualization phase, to its technical and aesthetical development, till its visual communication.

# Design and Innovation

Wheely is a collection of wheels that merges formal elegance with very innovative technologies. The convex shape of the tread was thought to improve manoeuvrability on soft surfaces.

The main structure is equipped with an exclusive patented system that stops hairs and fibres from getting

stuck into the mechanical parts in order to guarantee long lasting efficiency and functionality.

These wheels can be customisable with three different typologies of plates and equipped with manual or mechanical brakes.
